# Introduction

This guide provides information on using your HP Mobile Remote Control. The HP Mobile Remote Control allows easy and comfortable control of the notebook media software from the palm of your hand.

## Inserting the Battery

To insert the battery into the HP Mobile Remote Control, complete the following steps:

1. On the back of the remote control, turn the battery compartment cover counterclockwise ① and remove it ②.

2. With the positive side of the battery facing up, insert the battery into the compartment.

3. Insert the tabs on the battery compartment cover into the slots in the battery compartment and turn the cover clockwise to close.

## Storing the HP Mobile Remote Control

The HP Mobile Remote Control can be stored in the PC Card slot of your notebook for convenience and safety. To store the remote control, remove the PC Card slot blank, and then insert the remote control into the PC Card slot until it is firmly in place.

To remove the remote control:

1. Press the PC Card slot eject button **1** to release the remote control from the PC Card slot.
2. Slide the remote control **2** out of the slot.

# HP Mobile Remote Control Component Functions

The infrared lens on the remote control links the remote control to the notebook. The link requires a line-of-sight path between the infrared lens on the remote control and the infrared lens on the notebook.

Things to remember:

- The HP Mobile Remote Control operates within Microsoft® Windows®, QuickPlay (select models only), and InterVideo Home Theater software (select models only). Each button responds according to which application is active.
  - ☞ Refer to the InterVideo Home Theater on-screen help for remote control information.
- Some remote control buttons perform the same functions as notebook buttons. For example, the DVD button on the remote control and the DVD button on the notebook have the same functions and can be used interchangeably.
- Some remote control buttons perform the same functions as notebook key combinations. For example, the Information button on the remote control and the **fn+end** key combination on the notebook have the same function and can be used interchangeably.
- Other remote control buttons, such as the Photo button, provide functions which are not duplicated by notebook buttons or preset key combinations.
